

DESIGN REVIEW

Autism Spectrum Disorder Analysis for Toddlers

Batch No : B20

S.K Irfan Baba (227Z1A66B5)

Siri Vennela (227Z1A66C6)

Sarva Darshan (227Z1A66B4)

Under the Guidance of :-
Mrs. G. Manasa

System Architecture Overview

Web-based screening system with frontend, backend, and ML model

Frontend collects user data and displays results

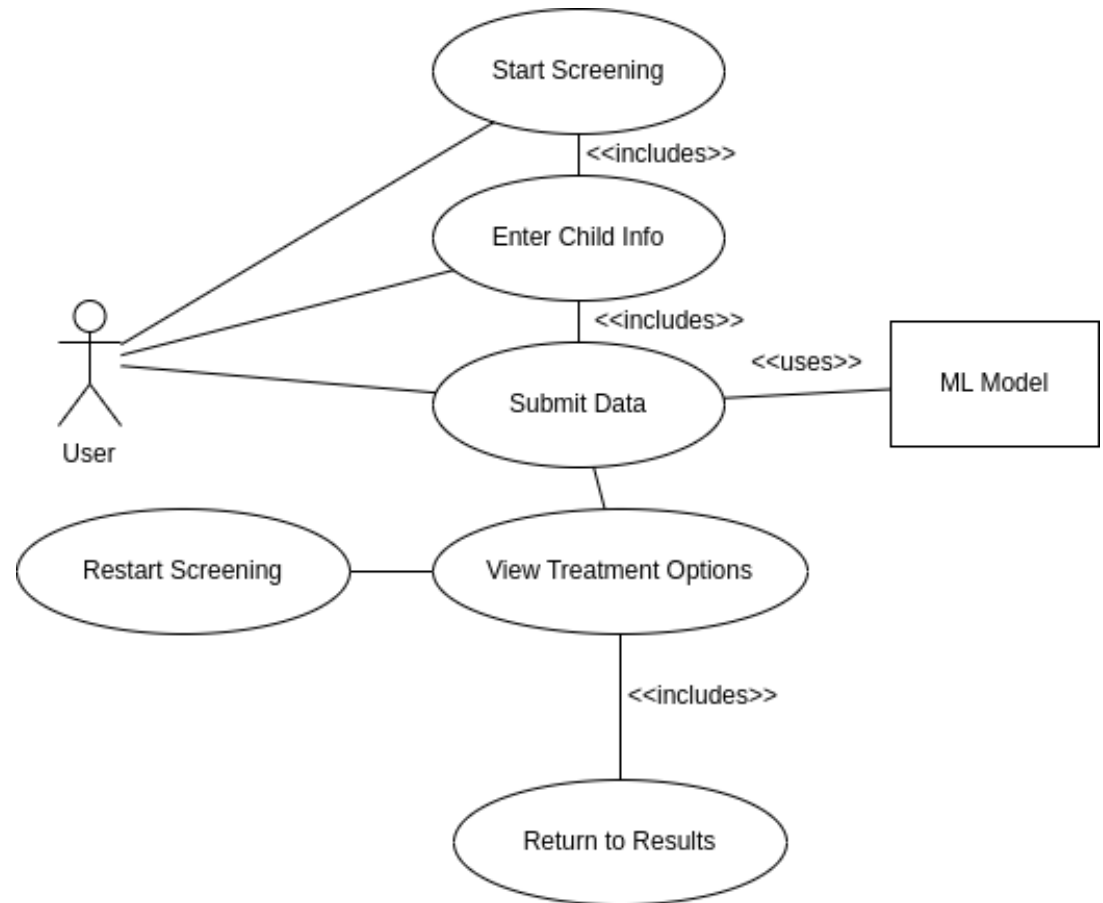

Backend handles logic, validation, and model inference

ML model predicts ASD risk from user input

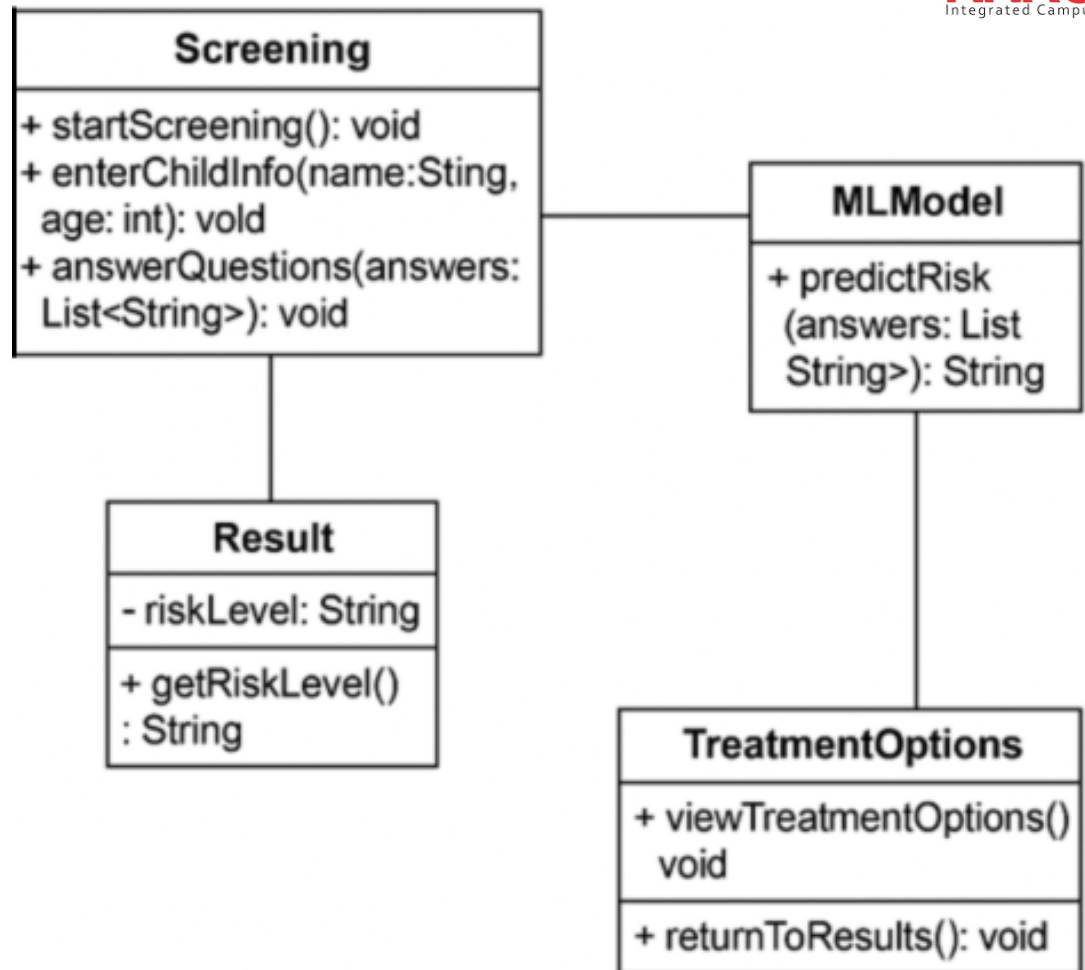

Use Case Diagram

- A use case diagram represents the interactions between users (actors) and a system.

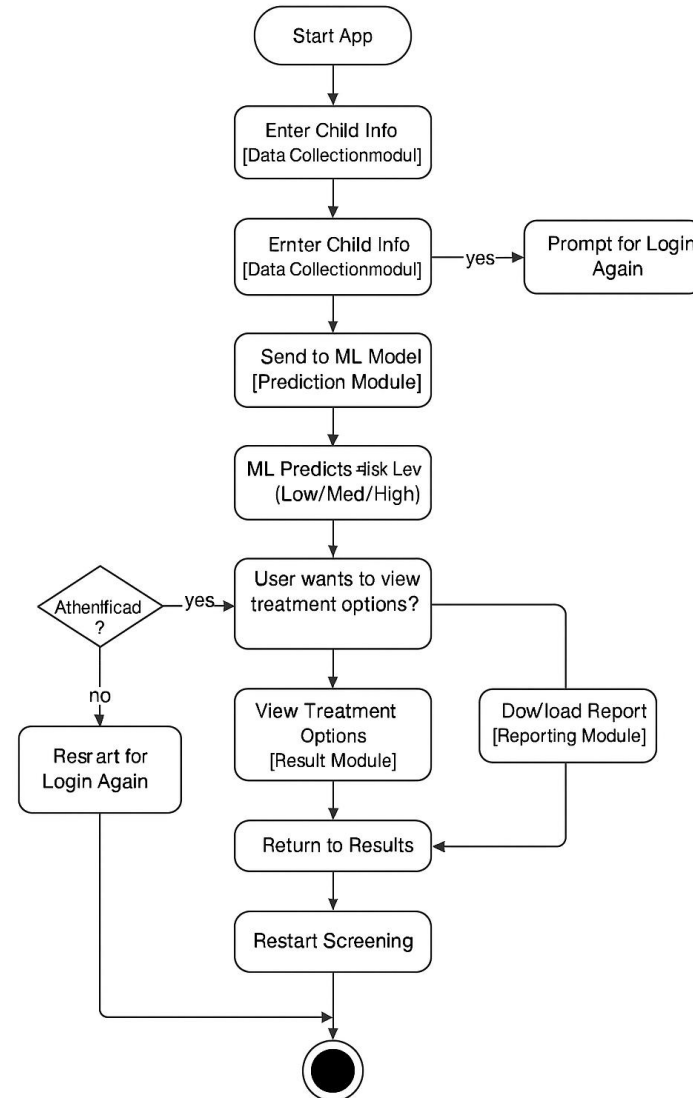

Class Diagram

- A **class diagram** is a blueprint for your system's structure, showing classes, attributes, methods, and relationships.

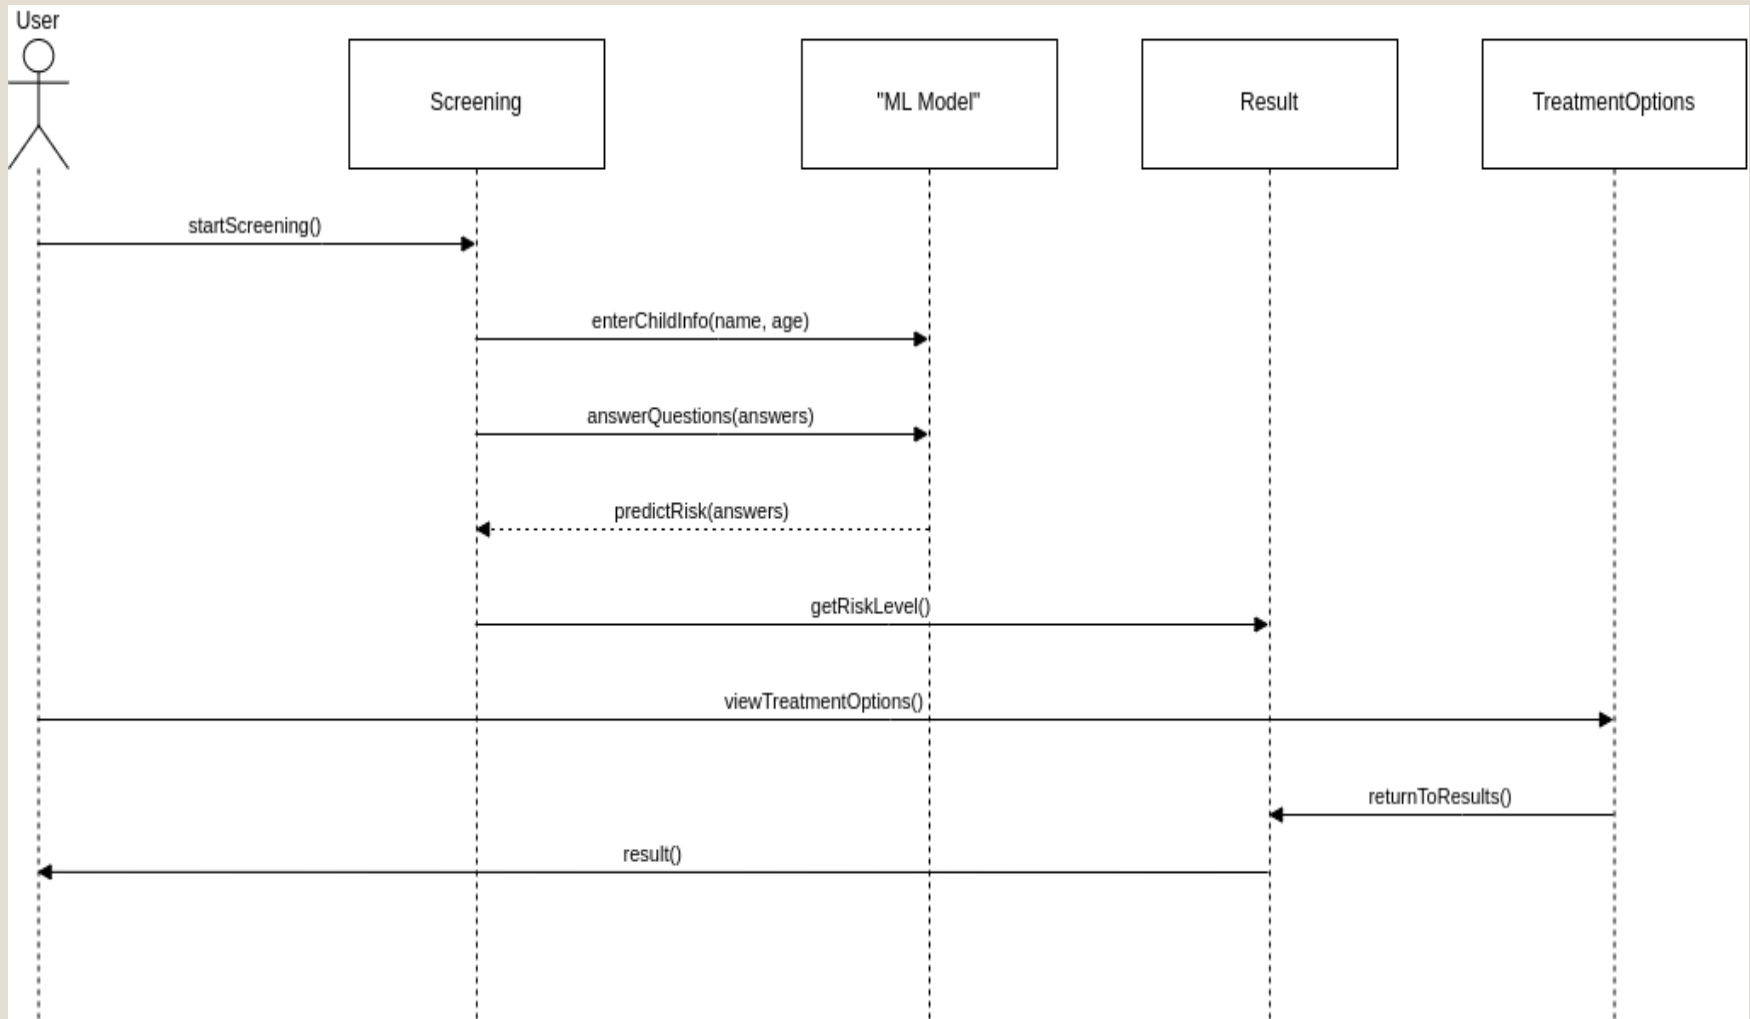

Activity Diagram

- An **activity diagram** visually represents the **flow of actions** within a process.

Sequence Diagram

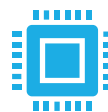

Module Design

Authentication
Module: Login,
Session

Data Collection
Module: Form and
Questionnaire

Preprocessing
Module: Encoding,
Scaling

Prediction Module:
ML model inference

Result Module: Risk
display and
interpretation

Reporting Module:
PDF generation and
export
